

Good Afternoon,

Over the last month we have been very busy with all the arrival of the seed along with delivering out to customers. We hope everyone is enjoying the warmer winter and is looking forward to the count down on spring.

If you have not yet tested your meters and are interested in pricing or more details call Cole or Jake today to get more information on are meter testing program.

We would also like to introduce you to Climate Corp. Most of you will be new to this and we would just like to take a few minutes to your time to explain what Climate Corp is. The Climate Corporation is a digital agriculture company that examines weather, soil and field data to help farmers determine potential yield-limiting factors in their fields. With Climate Field View you have three options for the app, starting at Prime then going into more with Plus and finally the full app Pro. Below there is a chart showing each option and showing you what it all included.

If your fields could talk, what would they say?

Climate fieldview does the listing so you can get the most out of every acre.

CLIMATE FIELDVIEW PRODUCT FEATURES

	CLIMATE FIELD VIEW prime	CLIMATE FIELD VIEW plus	CLIMATE FIELD VIEW pro
