

Good Afternoon,

With winter at its mid-point means spring will be here before we know it! With that being said, the seed warehouse is filling up fast with lots of great varieties.

Is your planter ready to hit the fields come spring? Are your meters tested?

Here at Shea AG we want to make sure your planter is running the best that it can!

Did you know that your springs, seals and bushes all wear inside your meter? Having them check could help eliminate any skips or doubles in your corn stand. Also checking to make sure your meters housing is cleaned and calibrated ensures that each seed that goes through your planter is positioned in a way that is genetic potential is maximized. If you would like to have your meters tested or have any questions about it give us a call.

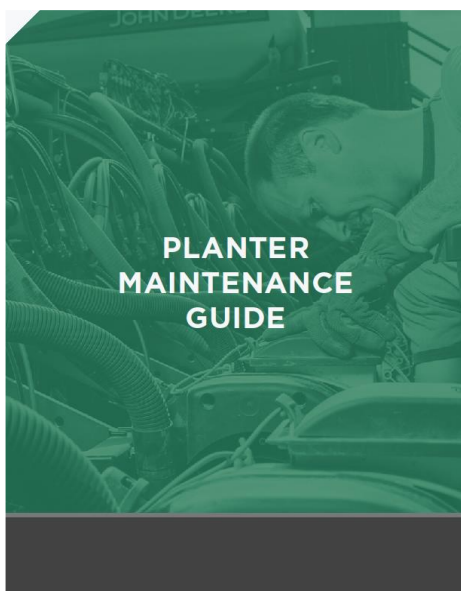

We have also attached a planter maintenance guide to help you check all your boxes to make sure your planter is ready for plant 25. There is always a few things you should keep an eye out for with wearing.

If you're looking to upgrade your planter and want it ready for spring 2025 contact us today! We do still have limited room available.

We will also be attending the Middlesex soil and crop February 25th from 9:00 am – 3:00 pm at Caradoc Community Centre 565 Lions Park Dr, Mount Brydges.

This year we attended the Precision Planting Winter Conference PTI meeting in Kitchener. For those who don't know PTI stands for Precision Technology Institute. Each year Precision planting gathers information from their research farms using different products with different Precision Planting Products. They gather all the information and present their findings with us. This meeting is open to the public and is a great opportunity to find out information on a product you might be interested in for your farm.

Attached is a short video of the farms with a little inside.

Every year they send out a summary of all their gathered information. We have summarised it into a few pages of what we would like to share with you! If you would like to see the full summary feel free to reach out and we would be happy to share it with you.

Attached is Shea AG's top corn picks from this year's 2024 research farm!

If you have any questions, feel free to reach out to our Shea AG team!
